

IHJ Special Program

Viewing Nuclear Energy Policy Throughout the World

After the Earthquake of 3.11, Japan faces the urgent necessity of reviewing its nuclear energy policy. The Fukushima crisis has brought about an increase in skepticism towards nuclear power plants and raises major issues of short-time power supply as well as of medium- to long-term energy, economic and environmental policy.

This program will invite specialists in nuclear energy policy in Japan and overseas to speak about current policies and the future, as an opportunity for each of us to think about what course Japan could pursue from now on.

VOL.1 Thursday, **June 16** 6:30 - 8:00 pm (Language: In Japanese only)

The Influence of the Fukushima Accident

~ No Borders in Nuclear Power Accidents

Speaker: **Endō Tetsuya** (former Chairman, Board of Governors, International Atomic Energy Association and Vice Chairman of the Atomic Energy Commission of Japan)
